## Free Electricity Generator – For the UBUNTU Village

\$20,000 needed to deliver our first 600 kilowatt FREE ENERGY Generator.

Hello Matt Watts

After five years of talking about new, alternative and FREE Electricity, I am delighted to announce that the UBUNTU head office in Waterval Boven is about to obtain such a device as an example of this new technology – but we need the help of our members around the world.

This unit will be installed by a willing municipality to test and evaluate its efficacy after which it will form part of the electricity supply to our town and community. Our plan of action is to use the electricity supply as a tool to unite the people and not divide the people any further.

We are of the belief that a single supply of free electricity to everyone in town is more beneficial to unite the people than individual small generators that would only be obtained by those who can afford them. Such a situation would simply divide the community even more as those with money would once again benefit while the poor would be left behind.

The generator is already on its way. I have paid for part of the transport from my own income and the donations made by a small number of monthly donors. But we need to raise more money to complete the delivery. Please help us in this critical time of change and be part of this historic event – this will be THE REAL GAME CHANGER for freeing the people from economic slavery.

**URGENT ACTION:** This is an urgent situation as I have to pay the full transport costs of \$20,00 by the end of next week. The full price of the unit is US\$ 120,000 – which will be paid from the monthly income. More details will follow as this exciting event unfolds.

### DONATIONS:

Please send you donations via PayPal to: [michael@zuluplanet.com](mailto:michael@zuluplanet.com)

Bank transfers: MJ Tellingner - ABSA BANK - Cresta Branch – Randburg, South Africa – Account number 4050410558  
Branch code: 632005 SWIFT Code: ABSA ZAJJ

### The Technology

I have seen many amazing discoveries and free energy generators over the past 2 years – but we have chosen this specific unit because it has been tried and tested in the EU for over 7 years with no problems or failures. It is also the only large unit we found for this purpose. For the sake of protection and security, we will keep the names and device details secret until it has been installed in about 6 weeks after which we will disclose and show everything to the UBUNTU members and others.

### Plan of Action – The Launch of True CONTRIBUTIONISM

Everyone will pay a set monthly fee for their electricity, based on the size of their house. We aim to set this fee at 50% of the current cost of electricity, and reduce this fee annually over 3 years after which the electricity supply will be free. This action will immediately provide a huge financial relief to everyone in the community and allow people to survive with much greater ease.

The monthly income from the electricity will go to the community trust account managed by the elders. We will use the income from electricity to fund the many different community projects and to launch many other projects on an on-going basis. The funds will allow us to bring in experts in every field of activity to become the master teachers that will transfer their skills to all those who participate in community projects.

What's the catch? Everyone who wants to receive this cheap electricity will have to contribute 3 hours per week in any one of the community projects. This will develop unity in our community allow people to mingle and get to know each other while

learning new skills. Those who choose not to contribute towards the community will continue paying the full price for their electricity. We trust that very soon everyone will join in.

The projects will start to generate a very good income which will make our town independent and able to achieve anything – while we are still trapped in this money driven system. We trust that once this has been implemented every other town will want to emulate this model and this will be the beginning of the end for the capitalist enslavement of humanity.

In love & unity

**Michael Tellingier**
